PROFILE

I am a dedicated and enthusiastic software developer, driven by a profound passion for creating elegant and efficient solutions to complex problems. My journey in the field of software development began during my previous role as a Cyber insurance broker, where my interest in coding was piqued. To further nurture this passion, I enrolled in the Northcoders intensive boot camp.

Through this experience, I have honed my skills in various programming languages and frameworks, cultivating a deep understanding of software architecture and design principles. My collaborative nature and strong communication skills empower me to thrive in team environments, allowing me to contribute meaningfully to shared goals.

TECHNICAL SKILLS

Javascript | C# | React | React Native | HTML5 | CSS3 | Node.js | Express | PSQL | SQLite | MongoDB | Jest | Test-Driven Development | OOP | Rest API | Web Servers | Git | Vite | Axios | Fetch | CRUD

EXPERIENCE

Trainee Full Stack Software Developer | Northcoders | 07/23 - 09/23

- Developed problem-solving skills by doing daily coding challenges with **Test-Driven Development**
- Engaged in pair-programming most days to solve complex coding challenges and create mini projects
- Embraced continuous learning and implemented feedback for improvement in future tasks
- Collaborated on team projects using **Agile methodologies** and version control with Git/Github

Solo Project - **Lawler News** [Hosted](#) | [Frontend](#) | [Backend](#)

- Fullstack news website with user interaction such as likes, adding or deleting comments
- Frontend with routing, user context, fully responsive layout, designed with vanilla CSS
- Backend with JavaScript, PSQL, Express and tested with Jest

Final Group Project - **Picture This Place** [Frontend](#) | [Backend](#)

- Fullstack mobile location-based guessing game where users can post a place with a picture for other users to go to the area and try and guess their location from the picture
- Planned and worked with 4 other group members using Excalidraw for planning and wireframes, Trello for our kanban board to plan and track progress
- Used the agile methodology throughout the project
- Frontend with react native, react navigation, react maps, expo location and expo camera
- Backend with MongoDB Atlas, Mongoose, Express and Node.js and tested with Jest

Cyber Insurance Agent | **The Insurance Octopus / Verastar** | 06/21 - 10/22

- Attended the National CyberSecurity Center's seminars to widen my knowledge to best help customers with their business needs to ensure their insurance covered them correctly without overcovering them
- As I was the first employee in this department I helped train new staff with their pitches and product knowledge
- Educate our customers on the cyber threats their businesses faced and searched a wide range of insurers and tailored packages to our customers needs
- Liaised with customers and managers to ensure the customer got packages right for their business
- Rang customers and educated them on the new telecom system and upgraded them
- Helped customers set up their new telecom system
- Handled complaints and retained customers
- Tech support for broadband and telecom issues

- Sold multiple product ranges such as gas, electric, water, broadband, telecoms

Digital Marketing Apprentice | Bathroom Takeaway | 07/16 - 09/17

- Managed multiple social media accounts
- Created and presented competitor and market analysis for individual brands
- Created and wrote wordpress blogs in which I had to learn and utilise html and css

INTERESTS AND HOBBIES

I am currently self-learning the Welsh language on Duolingo as I have fluent Welsh friends and family. In addition to this I have a keen interest in Golf, I try to play once a week or at least the driving range and playing every couple of months with my friends. We also play football from time to time.
